A complete and easy to use solution to recover corrupted Microsoft Word documents! Microsoft Word (like other word-processing applications) stores various formats of files such as text (.txt), rich text format (.rtf), tables, and so on. WordRecovery is able to recover these files and all other files that can be saved in Microsoft Word. It supports all Microsoft Word file formats and all document file types. If a corrupt document was saved using Microsoft Word, it can be recovered using WordRecovery. Recovering Microsoft Word files is a complex process. Many viruses can corrupt documents and corrupt them in multiple ways. Recovery for Word uses the strongest recovery techniques available to recover corrupted documents. Also, WordRecovery supports Microsoft Word recovery for Mac OS X. WordRecovery is the easiest-to-use Word recovery software available. It is very easy to use and requires no special skills to operate. It is a reliable tool for recovering corrupted documents, even complex files like tables. Moreover, WordRecovery is very easy to install and uninstall. Recovering Microsoft Word document files with WordRecovery is simple. You start the recovery process by choosing the file that you need to recover. The program then searches the entire hard drive for all potential damaged documents, images, tables and so on. When it finds a good candidate to be recovered, it starts to scan the file and eventually finds all of the elements of the file. It then displays them on the screen for you to verify. If the file is recoverable, you can recover it as you normally would. If it is not, you can restore a demo version of the file.
