CLAAS.Parts.Doc.v5.0.36.0.rar (Fin. 463 Pa. 90 (1974) Commonwealth v. Mayfield, Appellant. Supreme Court of Pennsylvania. Submitted November 16, 1973. October 29, 1974. Before JONES, C.J., EAGEN, O'BRIEN, ROBERTS, POMEROY, NIX and MANDERINO, JJ. OPINION PER CURIAM: Appellant was found guilty in a nonjury trial of criminal contempt in the Court of Common Pleas of Dauphin County, Pennsylvania, for wilfully and contemptuously refusing to testify as a witness in a former trial in that Court of the same person charged with murder. The evidence presented by the Commonwealth, *91 in part, was that in 1968 appellant, upon two separate occasions, appeared in the criminal division of the Dauphin County Court and refused to testify. His refusal was based on the fact that he had been convicted in 1961 of a crime of theft by receiving stolen goods, then in 1968 was arrested and charged with the murder of Roger Sufrin. Appellant was acquitted of the murder charge. In Commonwealth v. Mayfield, 449 Pa. 539, 544, 297 A.2d 115, 118 (1972), this Court said: "However, it is clear that our legislature did not intend contempt proceedings to be held as a substitute for a defendant's trial.... Nor does the statute [permitting testimony as to prior convictions] authorize a judge presiding at trial to refuse to take evidence, or to compel a defendant to testify solely because he has been previously convicted..." (emphasis supplied). Clearly, appellant's conviction in 1961 for theft of property was a conviction of a crime of the same nature as that for which he was then being tried. He was not convicted for theft as a result of a prior conviction, but for a prior crime in the same category as that for which he was then

The invention relates to a data-storing method of storing a plurality of image data and a data-storing apparatus of storing a plurality of image data. Recently, a method for recording/reproducing video and audio data compressed in accordance with a moving picture experts group-7 (MPEG-7) is proposed. For instance, for recording an audio video (AV) image, the MPEG-7 is used, or for broadcasting, it is further proposed that the MPEG-7 is used for broadcasting. The MPEG-7 is a standard of an encoding method of compressing data to be transmitted, and the MPEG-7 provides a decoding method corresponding to the encoding method, so that it is possible to accurately reproduce a transmission/recording object video and audio data. For instance, a moving picture data such as an AV image is composed of a plurality of frames, and the MPEG-7 is used to describe motion vectors, reference picture and encoded data of the corresponding frame of the moving picture data. When an object video and audio data is encoded by MPEG-7, if a set of one or more blocks of a first frame in the object video and audio data is partial matched with a set of one or more blocks of a second frame in the object video and audio data, the sets of the blocks are compared. More specifically, if the set of the blocks of the first frame is matched with the set of the blocks of the second frame, the set of the blocks is compared with a set of predetermined blocks. The predetermined blocks are matched with the set of the blocks of the second frame. After the set of the blocks of the second frame is matched with the set of the predetermined blocks, the matched blocks are compared with each other. At this time, the sets of the blocks are compared and a plurality of sets of matched blocks
