About PC game Blitzkrieg 3 Blitzkrieg 3 is a first-person shooter with an alternate history set in the 70's. The protagonist of the game, a Soviet scout, sets out to look for a Soviet scientific research base in the American "evil empire" of the time. In the process, the protagonist becomes embroiled in a campaign of destabilization of the political and ideological realms of the Soviet republics, and becomes an unwitting participant in a cold war that will be fought to the bitter end. Announces Grant of Oil and Gas Mining Lease in the U.S. Mid-Atlantic Region with Possibility for Lease Sale VANCOUVER, BRITISH COLUMBIA--(Marketwired - May 5, 2013) - SeaBed Energy Corp. (TSX:SEM)(SEA) is pleased to announce that the U.S. Secretary of the Interior has awarded a license to a partnership controlled by SeaBed to prospect in the Atlantic Ocean off the coast of Virginia, and other states in the United States. The area of interest is known as the Atlantic Flyway, and includes waters in three U.S. states, including Virginia, offshore Virginia and Maryland, Pennsylvania, New Jersey and Massachusetts. The Atlantic Flyway area has previously produced legacy heavy oil and gas resources, and includes the unleased Hog Island acreage which is of a size and scale comparable to the Landing Zone owned by SeaBed. SeaBed plans to renew its lease efforts in this important basin at a later date. A press conference will be held tomorrow afternoon for further details. The limited partners of Sea Bed, who own approximately 76% of the company, are pleased with the Secretary of the Interior's decision. "Sea bed's new venture partners, Blackbird Resources, have commenced operations in the Atlantic Flyway with a view to initiating lease sales, which we hope to begin imminently," said John Hess, managing partner, Blackbird Resources Inc. "We believe that it is important to initiate well testing and surveys to confirm the commercial nature of our prospects prior to declaring any interest in them. Additionally, we expect to follow-up with an acquisition of an interest in areas that ultimately produce commercial quantities of reserves." Rick Chiarelli, SeaBed's Chairman and Chief Executive Officer said, "Over the years SeaBed has aggressively acquired, tested and developed an extensive portfolio of prospects within the sub-sea Gulf of Mexico as well as the world's premier deep-water areas across the North Sea and globally in the deep waters off New Zealand. Our intentions are to continue this strategy in the United States of America in order to further expand our North Sea and world-class continental shelf holdings. This decision has proven to be a valuable opportunity to further develop and grow SeaBed within the United States of America. We are extremely optimistic about the exploration results to come and look forward to continuing our agreement with our joint venture partner, Blackbird Resources as we move forward into 2013." The Atlantic Flyway license granted to

The story of the "Unknown Alien Force (UAF)" could be the wrong one, it has been already selected by "US" i.e. United States military. The scientists of General Eisenhower's department told us that the main idea of this military operation is to kill all "unknown beings" or "alien giants" which got into the world after the nuclear-based tests of the US and USSR. "The Traveler" is one of them, the Hero of this game. He was born in South America, in a tribal region which was completely destroyed during the "World War II" (WWII). During his childhood in the tribal region, he became mentally ill and his mind is full of fantasy, nightmares and other strange things. An old shaman gave "The Traveler" a special belt called "The Belt of Truth" which is bound to the Hero and provides him with extraordinary gifts. The Hero also got the gift to perform actions by focusing on small things, such as dust on a table, which he will not notice and which will be executed perfectly to kill monsters. The Sword and the Shield is a masterpiece of Math, Physics and Game Development which is good for both new and old gamers. What a cool concept of combining two games genres, "2D Shoot 'em up + FPS" and you'll get the best of both worlds! You'll be able to play as much as you want for hours without ever getting tired. You can focus on the gameplay or watch in-game graphics. Where are the monsters? All of them have been fighting for their own survival against the UAF. First of all, they have to use their combat skills for their survival because all monsters are the craftsmen of destruction. They are providing the enemy soldiers with the necessary and enough weapons and powerful armor. All those monsters are based on the fairy tales, mythologies, science fiction, cartoons, comics or movies, but with the weaponry and the armor, which may be granted by the Belt of Truth. Who is the Hero? You'll find out when you play The Sword and the Shield. No, it doesn't mean that you'll play as a real Hero. You'll find out yourself who is the Hero of The Sword and the Shield. You'll don't say too much to him as he is crazy and it can result in a loss of control over him. You're getting in touch with him slowly, and gradually
