Similarly, a problem and the understanding of the causes of a problem mentioned in the background section or associated with the subject matter of the background section should not be assumed to have been previously recognized in the prior art. The subject matter in the background section may merely represents different approaches, which in and of themselves may also be inventions. The production of goods may be a hard problem to solve. For example, during the production of a product or the assembly of parts to make a product, the cost of producing the product may be increased by unexpected wear and tear, and/or by unexpected damage to the product or its parts. During the production of such goods, it is therefore important to know if the good is likely to have a good or a bad future, and to determine or predict the extent or likelihood of damage during the production process. Although a product that has been damaged will usually be unsuitable, such a product may still be suitable for some 6d1f23a050
