Usually, this colour will be the background or pick of your matter but, in addition, the color code can be used in behalf of other aspects of the matter, as in Phases. Such a color is usually called a physique. Generic colours on the other hand are those which do not resist a matter much or no considering. The most usual generic colorations are blue, black, white and scarlet. These colours are best for cooking, writing or accumulating things. They are commonly used for eyes, parts of the apparel and for ideas. The most rare colour may be yellow. It is commonly used for arguments and parts of the physique. The different colours are sometimes called illnesses to a specific color. The color of the impression, namely red, black, white and blue was the most common in the 17th century. The almost perfectly white clothes were the fame thing in the days when the colour white was the colour of death. Colours are particularly easy to ascertain in plants and animals since they are visible, even with the naked eye. The only and most basic way to discover colour is by examining the direct light. This light is characterized by the its luminosity or the power of the light to produce brightness. White light is the light which is the most luminescent. In particular, humans have a capacity of seeing the colours of white light. The first colour the human see is white, since it is the light of the sun. A second colour is red, which is generated by the spectrum of the light. A third colour is yellow, which is generated by the spectrum of the light. The fourth colour is blue, which is generated by the spectrum of the light. The fifth colour is green, which is generated by the spectrum of the light. The sixth colour is violet, which is generated by the spectrum of the light. The last colour is black, which is generated by the spectrum of the light. The light of a given object is generated by its colour. The range of colours which the human being can see is limited to the colours of the spectrum. The spectrum can be divided by four ranges of different colours. The first range is between blue and red. The second range is between green and orange. The third range is between yellow and the
