I also use it to transfer documents to and from my phone. For example, I'll download several pages from a legal document onto my phone and transfer them to my email. I think this is a very good program, because the quality of the bluetooth connection is perfect. But I'd really love a better support for my bluetooth dongles and better sync options. I'll be back to provide a more in-depth review with links for free BlueSoleil drivers and other comments, but for now, the first dongle I'm looking for is "the best". BlueSoleil 10 offers a variety of sync options. You can sync your music library, SD card, pictures, contacts, and other files. When a sync is initiated, BlueSoleil creates a folder for all of the synced devices, and then synchronizes between those folders and the server. I should point out that the free version of BlueSoleil 10 offers support for Windows Vista and Windows 7. Some of the supported Bluetooth dongles include the ADI GALAXY BT 6.0 and ADI GALAXY BT 2.1. BlueSoleil 10 supports mainstream chipsets such as CSR, Broadcom, ISSC, Texas Instruments, Atheros, 3DSP, Marvell, Accel Semiconductor, Conwise, etc. and supports more Bluetooth laptops, e.g. Lenovo ThinkPad, HP, Dell, Sony, ASUS, Samsung, TOSHIBA and LG etc. Premium Group's BlueSoleil Premium 10 drivers support most newer processors. It also features all native Bluetooth technology and it also includes a broad spectrum of internet and USB technology. As you cannot download this driver unless you are using Windows 7, then we provide a download link here at Refurbished that you can use. This link will take you to the Warez site, and there you will be able to download this driver.
